How to access

Sesame Street ebooks

& Tumblebooks on iPad

- Update the operating system on your iPad to the latest version by connecting the device to your computer and choosing the IOS update. It is free. (Newer IPads may update automatically through a wireless connection).

- Go to the App store on your device and download the "Rover" app for free. (Tumblebooks & Sesame Street ebooks use Flash and the iPad can't read Flash. Rover converts Flash application to a format that will work with the iPad).

- Open "Rover" and type the Library url in the search box: mountainview.gov/library

- Choose the Children Link on the left hand side of the page and then Tumblebooks or Sesame Street ebooks.

- All books should play just fine.

- If you experience jerky play or frequent frozen images the problem is probably a result of your connection rather than with the device. Try it in a different location with a better signal.
